

JAWAHAR NAVODAYA VIDYALAYA IDUKKI KERALA

Report of the Organization of Activities under “ Ek Bharat Shrestha Bharat”

The following activities have taken place in JNV Idukki for the quarter ending 31/12/2017

The district of Idukki is well known for its spices. The migrated students were taken to the spice gardens in and around our locality where farmers showed them the details of its cultivation and harvesting.

Once abundant in coconuts, from which the state has earned its very name, are planted in the campus with the help of students. So the migrated students watch the growth and learn the steps in nurturing them on a day to day basis. The commonly found vegetables are grown on the campus to give a firsthand experience to the students on vegetable cultivation. The banana groves around the dormitories ensure a rich learning experience as well as abundant supply of plantains.

To share knowledge about the agricultural practices in different states, a video on wheat cultivation was shown to the local students, supplemented the real life experiences of the fellow students from Uttarakhand.

The richest experience to the migrated students was when they were sent along with their friends to the remote corners of this district. There they came to know about the eating habits, celebrations and cultural differences among people. With new dresses and new dishes they came to know what 'Onam' really is.
