Report
"EBSB Alliance: Uniting Clubs for Collaboration"

Name of the Activity – EBSB Alliance: Uniting Clubs for Collaboration

Activity Date: 26th January, 2024

Venue: Online

Report Description:

Objective: The objective of the collaboration is to align and synchronize with fellow EBSB clubs from different states regarding the events and activities they have organized. It also aimed to create a great platform to promote the activities conducted in EBSB clubs across India.

Target Audience: EBSB Clubs of different states and colleges namely Indian Institute of Information Technology, Bhopal and Coimbatore Institute of Technology.

Event Summary:

We partnered with EBSB clubs from different colleges and states, reaching out to them to share videos capturing the events they had organized. Once we received these videos, we combined them into a cohesive reel for Instagram. This process involved working together with multiple clubs to create a unified and collaborative presentation of the diverse events happening across various locations.

Event Highlights:

- The collaboration involved clubs from various colleges, indicating widespread participation and interest across different educational institutions.
- The fact that other clubs also expressed a desire to collaborate highlights a shared enthusiasm for working together and leveraging collective strength.
- Interacting with diverse clubs sparked the generation of fresh event ideas, showcasing the value of collaborative brainstorming and cross-pollination of creativity within the EBSB community.

Event Outcomes:

- Collaborating with other clubs gave us practical insights into their operational methods, helping us understand how they plan and execute events.
- Engaging with clubs from diverse backgrounds allowed us to grasp their unique organizational cultures, providing a broader understanding of the EBSB community's diversity.
- Through these interactions, we discovered potential opportunities for joint events and initiatives, paving the way for future collaborations and strengthened bonds within the EBSB network.

Activity End Date – 26th January 2024

Number of participants – 2
