

VISIT TO LOHGAD

The EBSB program at College of Engineering Pune took place between 8th March 2020 and 13th March 2020. In the event, 34 students from Gandhi Institute of Technological Advancement, Bhubaneswar along with 2 faculty members participated.

An action-packed day meant an early start. Due to this, the day started at 6:00 am with the guests and student coordinators boarding the bus to travel to Lohgad. Students were provided with Caps and safety masks (as a precautionary measure), and breakfast was taken at the base of Lohgad fort. Then the students started the climb to the fort which was a first-time experience for many of them. It took around 4:00 hours for the students to climb the fort and come back. During the trek, the guests were guided by the faculty incharge and student coordinators of COEP. After the trek, the lunch was taken at Lohgad.

As per the plan, the students were then taken to Sunil's Wax Museum which is among the famous attractions of Lonavala. The guests enjoyed clicking their pictures with wax models of celebrities like Virat Kohli and Amitabh Bacchan

But how can you enjoy a MAharashtrain destination without typical Marathi food? SO the next stop for us was the famous Marathi food hotel, Vishnuji Ki Rasoi. The guests really enjoyed the Marathi food among which the most liked item was Puran-Poli. After the dinner, the guests were routed back to the hostel and the day was called off.
