Poster Competition on Water Conservation 6th March, 2020

SBS has also organized a poster competition on water conservation on the same day. Main aim behind this program was to create

awareness about saving water. This competition brought attention to the importance of water as a resource. Students used their artistic talents to celebrate drinking water and promote water conservation and efficiency. The competition was designed to encourage the young artists to express their own ideas in relation to the chosen theme. This year's theme is “the value of water”.
