

REPORT ON THEMED DISPLAY

Dr.G.R.Damodaran College of Science (Autonomous), Coimbatore, Department of Computer Science and Geo Green Computing club jointly organized Model contest & Technical Exhibition entitled “Green Computing” for the students on 10.01.2020 . Students participated in various events like model contest, technical shows and sketching on various ways of saving environment. The themed displayed for the Model Contest includes E-Waste Management where models can be created using discarded electronic or electrical components, Power Management in which the models explain the cost saving by effective usage of power and Water Management where the models explain the optimum use of water resources (recycling of water, harvesting rain water etc) can be displayed.

Students can screen their movies involving animations, latest technical skills on Green Computing, environment conversation in Technical shows contest. The Sketching/Painting contest is based on various themes like Pollution- in which the picture depicts part of the environment which affects or results based on any kind of pollution(eg: Air, Noise ,Water), Global warming where the Picture describes the causes, effects and prevention of global warming and vision for green world which brings out the innovative idea on building a green world in the future.
