

Kaladarshan

How can a person show-case his talent?

Fine Arts and Photography society (F.A.P.S.) gives opportunity to creative minds to do so. They showcase it by conducting the **KALADARSHAN**, a “Showcase of Art” on 20th August, 2019. They give chance to its members to push to their limits and perform a five-minute artwork. This include every participant to make a artwork under the time span of two to three minutes know as speed art. Students perform **Calligraphy, Painting, Spray-painting, etc.** In such a short time, the quality of artworks made is extraordinary. We also came to know about the main event of the society, which is “**Kaleidoscope**” which held on 7th of November 2019.They gave us information of the society and tentative dates of the recruitment of the freshmen.

- Wall Painting

The wall painting done by the members of Fine Arts and Photography Society commenced in September. It concluded under Peda. The theme relayed the central idea of saving energy via keeping temperature of air conditioners at 24 degree Celsius. The elements painted on the wall include an AC having a remote control and incrementing the temperature of another AC to 24 degrees. A comic strip shows a

devil sitting in hell asking his AC to be repaired. Bullet points portray the further reasons to diminish the excess use of energy resources. In a nutshell, the wall painting asks the viewers to save energy to eventually save earth.
