WORLD FIRST AID DAY

REPORT

We must be very thankful to the management, Principal and whole team of Sudar hospital ,to conduct this valuable program . Because “HEALTH IS WEALTH “ .The Dean of sudar hospital explained the following information. The term “First Aid” means the help that is provided to any one who is suffering from disease or damage. It is primary goal is to protect the life and keep the condition from worsening . In an emergency , even ordinary people can help and can save someone’s life by providing first aid. First aid kit mostly have in our home and infact we should carry it via travelling. After the Doctors talk, we had a practical demo session given by their team. Students also involved in this session. The students are very happy to learnt the ways of giving first aid.

First aid Awareness Program
