

Vigilance Awareness Week-2019

Now a day corruption is a most spreading disease in the world. A person got that corrupted money not to do the apart from the actual work, they got that money only to do their actual work. The young people are the only medicine to cure this disease because latterly they are becomes a government official in our country. So we conduct an awareness camp about the vigilance because our student's also comes as a government official in future that's way we insist the students to take a pledge against corruption.

“Corruption is a spreading disease”

“We are the only medicine to remove the corruption from the world”
