

## **Core Group Activities**

On the 5th of September, 2019, the Core Group students of our college visited "Naveen's Garden" an animal rescue shelter and innovative farming unit located at Mavilipatty, Musiri. The students interacted with the volunteers in the garden and learned about miyawaki method in farming and animal husbandry. To learn about integrated farming whereby organic farming is carried out with the latest technology alongside many exotic flora and fauna was a real educational exposure to the students. They enjoyed the lush greenery of the garden and the friendliness of the animals at the shelter, which altogether propelled a change and shift in attitude and approach towards ecological balance and green movement.
