

# **GURU NANAK COLLEGE (Autonomous)**

Guru Nanak Salai, Velachery, Chennai - 600 042

## **REPORT**

- 1. Event Title : ONLINE CERTIFICATE COURSE ON “PYTHON PROGRAMMING FOR LIFE SCIENCES”**
- 2. Category : UG/PG STUDENTS, RESEARCH SCHOLARS AND FACULTY OF LIFE SCIENCES**
- 3. Department : GURU NANAK CENTRE FOR RESEARCH (GNCR)**
- 4. Date : 1<sup>st</sup> – 7<sup>th</sup> JULY, 2020**
- 5. No. of Participants : 100 Nos.**
- 6. No. of Resource Persons : 2 Nos.**

### **Report Description:**

The Online Certificate Course on “PYTHON PROGRAMMING FOR LIFE SCIENCES” was conducted by the Guru Nanak Centre for Research (GNCR) of Guru Nanak College (Autonomous) for One Week from 1<sup>st</sup> July to 7<sup>th</sup> July, 2020. The objective of this online certificate course was to provide basic knowledge of Python Programming to Life Sciences Scholars. This Course was designed to help learners take their first step towards enriching their knowledge using the fundamentals of Python programming. Out of total 168 Registrations received, 100 applicants were selected for the Online Course.

The first day of the online course was inaugurated by Dr. M. G. Rangunathan, Principal with this energetic Welcome Address. He welcomed the Resource Persons and the Participants from different Institutions across the State of Tamil Nadu who joined virtually. Dr. J. Jayanthi, Dean Research of Guru Nanak Centre for Research greeted the participants and introduced the Resource Persons Dr. J. Vanathi and Dr. Mahendrakumar. M. The Online Course was conducted through Google Meet with Attendance and Final Assessments were done by Google Forms.

The Online Course was conducted as per the below mentioned schedule.

**DAY 1: INTRODUCTION, HISTORY, INSTALLATION OF PYTHON**

**DAY 2: PYTHON IDENTIFIERS**

**DAY 3: PYTHON OPERATORS**

**DAY 4: DECISION MAKING**

**DAY 5: STRINGS IN PYTHON**

**DAY 6: PYTHON COLLECTIONS**

**DAY 7: THE ROLE OF PYTHON IN LIFE SCIENCES**

The last day of the Course was concluded with valedictory function where our Principal, Dr. M. G. Rangunathan delivered the Welcome Address and Dean Research of GNCR, Dr. J. Jayanthi spoke the concluding remarks about the course. The participants were happy about getting an opportunity to learn a new programming language and also expressed their satisfaction about the way the online course was conducted. All the participants thanked Guru Nanak Centre for Research for this initiative. Finally the Dean Research, Guru Nanak Centre for Research, Dr. J. Jayanthi rendered the Vote of Thanks.

The Learning Course material of the seven day Programme was compiled and sent to all the participants. The Participants were tested with an Online Assessment and all those who secured 40 % and above were issued the Certificate of Completion of the Online Certificate Course.

# INVITATION

## GURU NANAK COLLEGE (Autonomous)

Re-accredited at 'A' Grade by NAAC  
Guru Nanak Salai, Velachery, Chennai – 600 042.

### GURU NANAK CENTRE FOR RESEARCH (GNCR)

## ONLINE CERTIFICATE COURSE

ON

## PYTHON PROGRAMMING FOR LIFE SCIENCES

### HARDWARE REQUIREMENTS:

System: **Laptop / Desktop**

Operating System: **Windows 7, 8, 10**

RAM: **1GB or more memory**

Hard-Disk Drive: **250 GB**

### DATES

**1<sup>st</sup> - 7<sup>th</sup> July, 2020**

### TIME

**2.30 p.m. – 3.30 p.m.**

### Resource Persons

**Dr. J. VANATHI**  
Assistant Professor & Head,  
Department of B.Sc., (I.T.)

**Dr. MAHENDRAKUMAR. M**  
Assistant Professor,  
Department of Biotechnology

### WHO CAN ATTEND ?

*UG & PG Students, Research Scholars  
and Faculty of Life Sciences*

### NO REGISTRATION FEE

Register @

<https://forms.gle/dgPYSrcUM91sZBWD6>

Participants must clear the online Exam to  
qualify for the Certificate

Python Identifiers

A Python identifier is a name used to identify a variable, function, class, module or other object.

Rules for Python Identifiers

Identifiers can be a combination of letters in lowercase (a to z) or uppercase (A to Z) or digits (0 to 9) or an underscore .

Example - Valid

Names like myClass, var\_1 and print\_this\_to\_screen, all are valid example.

An identifier cannot start with a digit.

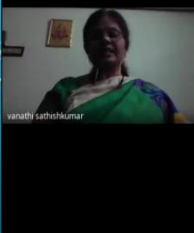

Example - Invalid

1variable is invalid.

But variable1 is a valid name.

Keywords cannot be used as identifiers

Python is a case-sensitive language. This means, Variable and variable are not the same.

varathi sathishkumar

PYTHON VARIABLES

Variables are nothing but reserved memory locations to store values.

When you create a variable you reserve some space in memory.

In Python, a variable is seen as a tag that is tied to some value.

Example : num = 1

Python consider the value as objects.

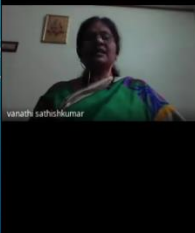

Based on the data type of a variable, the interpreter allocates memory and decides what can be stored in the reserved memory.

By assigning different data types to variables, you can store integers, decimals or characters in these variables.

Variables do not need to be declared with any particular type and can even change type after they have been set.

Example

```
X = 10
X = "ABC"
```

## BIOPYTHON

Guru Nanak Centre for Research

## Python for Collaborative Drug Discovery

- ❖ Finding a new drug often takes over a decade and more than \$800 million. A big problem early in the process is identifying those candidates more likely to be good drugs from the vast universe of possible molecules.
- ❖ To save time and money on laboratory work, experimental chemists use computational models to narrow the field of good drug candidates, while also verifying that the candidates to be tested are not simple variations of each other's basic chemical structure.

Guru Nanak Centre for Research

## PyMOL

PyMOL is a powerful Python-Based Software for Computational Drug Design tool that displays the 3D structures of biological targets and offers up to 12 different stereo visualization modes.
