

**PG DEPARTMENT OF COMPUTER SCIENCE**  
**HOLY CROSS COLLEGE (AUTONOMOUS), TIRUCHIRAPPALLI – 620 002.**  
**INFORMATION TECHNOLOGY IN HEALTH CARE**

**Details of the Webinar:**

Activities Start Date : 04-07-2020  
No. of Resource Persons : 1  
Activities End date : 04-07-2020  
No. of Participants in the Webinar : 88

**Report Description:**

The PG Department of Computer Science (Shift II), Holy Cross College (Autonomous), Trichy organized a webinar on “INFORMATION TECHNOLOGY IN HEALTH CARE “ for the students of B.Sc. and M.Sc. on 04<sup>th</sup> July 2020 (Saturday) through Google Meet video conference platform. The Session was started at 03:00 p.m. with welcome address by Mrs.Emima. Then the Session was handed over to the speaker of the session Mrs.Leena Dhevakumar, Director-Product& Co-founder, GE Healthcare Ltd, Bangalore .

She explained about the Learning Platforms i.e Face to Face Learning, Online self paced learning and Online collaborative learning. She also explained about the Health Level 7(HL7), Integrating Healthcare Enterprise(IHE), Health Insurance Portability & Accountability Act (HIPAA). Further, she explained about the development issues in the field of health care and emphasis. At end of the session she interacted with the students and staff members to clarify their doubts.

The Session ended at 04.30 p.m. with vote of thanks by Mrs. Amala Deepa., followed the students filled their feedback form and most of the students felt the webinar session was very useful and informative to them.

### DICOM Digital Imaging & Communication in Medicine

American College of Radiology (ACR) and the National Electrical Manufacturers Association (NEMA) formed a joint committee in 1983 to develop a standard to:

- promote communication of digital image information, regardless of device manufacturer
- Facilitate the development and expansion of PACS
- Allow creation of diagnostic information data bases that can be interrogated by a wide variety of devices distributed geographically.

### HL7 – Health Level 7

- HL7 serves as a way for inherently disparate applications and data architectures operating in a heterogeneous systems environment to communicate with each other.
- The primary goal is to provide standards for the exchange of data among healthcare computer applications that eliminate or substantially reduce the custom interface programming and program maintenance

### IHE – Integrating Healthcare Enterprise

- IHE is an initiative by healthcare professionals and industry to improve the way computer systems in healthcare share information.
- IHE promotes the coordinated use of established standards such as DICOM and HL7 to address specific clinical need in support of optimal patient care. E.g IHE Profiles – Cardiology, Eye Care, IT Infrastructure, Laboratory, Patient Care Devices, Radiology
- IHE Connection

### HIPAA

**Health Insurance Portability & Accountability Act**

The Health Insurance Portability and Accountability Act of 1996 (HIPAA), Public Law 104-191, was enacted on August 21, 1996. Published in 2001 and came to amendment in April 2006.

- Security standards in HIPAA were developed for two primary purposes.
  - Protect electronic patient health information
  - Protect individual's health information.
- What information is protected?
  - All "individually identifiable health information" held or transmitted by a covered entity or its business associate, in any form or media, whether electronic, paper, or oral. The Privacy Rule calls this information "protected health information (PHI)."

### Challenges

- Less/No investment on migration from old practices / processes
- Slow adoption of technology
- Defining monetization approach is complex as Healthcare workflow is different across regions
- TeleHealth initiatives mainly used as a tool for patient acquisition

### Focus Areas

- Integration standards (e.g. Continua Alliance)
- Develop specialty/disease specific TeleHealth programs
- Targeted innovations & Cost effective solutions
- Artificial Intelligence driven precision diagnostics
