

# GURU NANAK COLLEGE (AUTONOMOUS)

Affiliated to University of Madras and Re-Accredited at "A" Grade by NAAC

Guru Nanak Salai, Velachery, Chennai – 600042.

## Guru Nanak Centre for Research

<b>Event Title</b>	National Webinar on "Research in Computer Science and Research Careers in India"	
<b>Category</b>	All Students Research Scholar and faculty members	
<b>Date</b>	<b>From: 19.09.2020</b>	<b>To: 19.09.2020</b>
<b>No. of Resource Person</b>	Dr.M.V. Srinath Director STET Women's College Mannargudi	
<b>No. of Participants</b>	250	

### (1) Report Description

The Guru Nanak Centre for Research (GNCR) organized National Webinar on "Research in Computer Science and Research Careers in India" on 19th September, 2020 by Dr. J. Jayanthi, Dean Research through Google Meet Platform for Students, Research Scholars and faculty members.

Dr.M.V. Srinath., Director, STET Women's College Mannargudi was the resource person who delivered the presentation about Research in Computer Science and Research Careers in India. More than 40 Colleges across the country actively participated in the event.

### (2) Report

The expanding scope of 'computing science' makes it difficult to sustain traditional scientific and engineering models of research. In particular, recent work in formal methods has abandoned the traditional empirical methods. Similarly, research in requirements engineering and human computer interaction has challenged the proponents of formal methods. These tensions stem from the fact that 'Computing Science' is a misnomer. The speaker clearly described about topics that are currently considered part of the discipline of computing science are technology rather than theory driven. This creates problems if academic departments are to impose scientific criteria during the assessment of PhDs. It is, therefore, important that people ask themselves 'What is Research in Computing Science' before starting on a higher degree. He also delivered a clear insight into the research careers in India.

REC

Science and Engineering Research

- Science research: Focuses on discovery of facts and laws of nature
- Explains, predicts, defines limits,...
- Engineering is a synthetic discipline; engineering research facilitates creation
- Creation of new artifacts
- Or improving existing artifacts
