Report

Ek Bharat Shreshtha Bharat (EBSB) Club, Govt. Degree College Vailoo Larnoo, Anantnag organized an awareness programme on Water Conservation on 18th Sept. 2021. The event saw a fair participation of students from different semesters of the college.

Asif Ahmad Rather and Arshid Majid Rather were the invited speakers on the occasion. Asif Ahmad Rather while speaking on the occasion said that approximately one third of the global population depends on groundwater for drinking water and securing a safe and renewable supply of water for drinking is one of the crucial drivers of sustainable development for a nation. However, urbanization, agricultural practices, industrial activities, and climate change all pose significant threats to water quality. Water contamination is a global problem that has a significant impact on human health and ecological services said Mr. Rather.

Arshid Majid while addressing the participants stressed on the fact that water is definitely the most important natural resources that living beings need, but at the same time, it has been misused and wasted. Mr. Arshid also spoke about the various approaches to conserve water; He said one simple yet often disregarded strategy to cut water bills is to use water twice, unlike electricity; water can be reused over again and again. That is the idea of water conservation.

The proceedings of the event were carried by Raof Ahmad Bhat, Nodal Officer EBSB Club. Mr. Bhat while presenting vote of thanks thanked both the invited speakers for enlightening the students regarding the issue of water conservation. While concluding the event, Mr. Bhat stressed on the students of the college that we have to understand first that the preservation of water is the obligation of each individual. It is to be done as a whole as it requires a whole of society approach. No government authority or institution can help us in saving water unless we desire to. Right now is a high time to do so.
